HEALTH, SAFETY & ENVIRONMENT POLICY

1. HEALTH & SAFETY: -

1.1 GUIDANCE TO RELEVANT LEGISLATION.

All the works will be undertaken in accordance with site safety regulations. The site will be kept clean and tidy in accordance with site safety regulations. All the machinery works will be performed in accordance with site safety regulations. All the workers on site should abide to the HSE plan

PERSONAL PROTECTIVE EQUIPMENT

1.1.1.1 HEAD PROTECTION

Workers should wear head protection at all times. Safety hats consist of outer shell and an inner suspension. Plastic and fiberglass hats are good choices for landscape work, because they resist water, impact and burning.

1.1.1.2 HEARING PROTECTION

Good personal hygiene is important when using insert-type ear protection. Muff or cap-type devices cover the external ear to provide an acoustic barrier. In some situations, they may offer better hearing protection than inserts. Wear protection when noise levels are over 85db.

1.1.1.3 EYE PROTECTION

Safety eye wear includes spectacles and sunglasses with impact-resistant lenses, and flexible or cushion-fitting ventilated plastic goggles.

Face shields protect against splashes and small flying particles, but not against heavy impact. If considerable impact resistance is required, safety spectacles or goggles should be used with the shield.

1.1.1.4 FOOT PROTECTION

Safety boots should be the regular footwear for all workers.

1.1.1.5 HAND PROTECTION

A pair of stout leather gloves provides good gripping power And protects hands. Unlined neoprene gloves are best for handling pesticides

1.1.1.6 Responsibilities:

- It is the Project Manager's duty to ensure that all necessary safety and protective equipment are provided along with the properly trained and qualified personal.
- It is the Foreman duty to organize the work in a safe manner, and in accordance with the standards.
- It is the workers' duty to obey all the safety rules. They must perform the work in accordance with the Method Statement.
- It is the duty of Safety officer (assigned Foreman) to supervise and monitor activities and perform as per the guidelines of HSE standards

1.1.1.7 OTHER SAFETY PRECAUTIONS

- ✓ High visibility vest should be always worn on duty as the landscape area is close to motor way
- ✓ Dust masks will help to reduce the risk of inhaling the plant protection chemicals or will reduce the risk of inhaling dust when using blowers or hedge trimmers
- ✓ When operating machineries or working closer to road, barricading and warning signs should be kept
